Total Cost of the Project for 2 years

(A+B+C) :

Total cost of Project for 2 years

(A+B) in words

Note: The total cost of the project must be equal to sum of the A +B +C which in turn must be equal to sum of the individual components.

For Commercial Evaluation only the total cost would be considered.

All prices must be inclusive of all taxes .

If the amount quoted by bidder for any item of financial bid does not match with the rate quoted by him due to calculation error, then rate quoted will be considered and not the amount.

If there is difference in rate quoted by bidder in words & figures then which ever is less will be considered.

Note: The total cost of the project must be equal to sum of the A +B +C which in turn must be equal to sum of the individual components.

For Commercial Evaluation only the total cost would be considered.

All prices must be inclusive of all taxes .
